EXECUTIVE SUMMARY	1
I. Purpose and Scope	1
II. Background and Institutional Setting (Sections 1 and 2)	3
III. Identified Flow Management Issues (Section 4)	3
IV. The Strategy For Resolving Flow Management Issues (Sections 3 and 4)	4
A. Process Recommendations (Section 3)	4
B. Technical Recommendations (Section 4)	5
V. Case Studies (Section 5)	6
A. Evaluation of the Trout Unlimited Minimum Flow Proposal for the Upper Basin	6
B. NYC Reservoirs Operated to Meet the Trenton Target	6
C. NYC Reservoir Balancing	6
D. Rafting Releases at Beltzville	6
E. Temperature Control Below Blue Marsh Reservoir	6
VI. Additional Products Completed for This Project	7
 1.0 INTRODUCTION	 1.1
1.1 Water Resources of the Delaware River Basin	1.1
1.2 Delaware River Basin Commission's Role in Flow Management	1.2
1.3 Study Background and Authorization	1.3
1.4 The Need for Additional Tools for Flow Management Decision-making	1.4
1.5 Study Goal	1.5
1.6 Study Area Description	1.5
1.7 Study Limitations	1.5
 2.0 UNDERSTANDING FLOW MANAGEMENT IN THE DELAWARE RIVER BASIN	 2.1
2.1 What is Flow Management?	2.1
2.2 Water Uses	2.2
2.2.1 Withdrawals and Consumptive Water Use	2.2
2.2.2 Instream Water Uses	2.2
2.2.3 Trends in Water Use	2.5
2.3 History and Current Policy	2.6
2.3.1 The U.S. Supreme Court Decree of 1931 and the Amended Decree of 1954	2.6
2.3.2 The Delaware River Basin Compact	2.8
2.3.3 New York City Delaware System Operations	2.9
2.3.4 Drought of the 1960s	2.11
2.3.5 1982 Good Faith Recommendations	2.12
2.3.6 Drought Operating Plans	2.15
2.3.7 River Master (Daily Operations)	2.16
2.4 Current Delaware River Basin Operations	2.17
2.4.1 NYC Reservoir Operations and the Montague Target	2.17
2.4.2 Lake Wallenpaupack and the Mongaup System	2.18
2.4.3 Beltzville, Blue Marsh, Nockamixon and F.E. Walter Reservoirs and the Trenton Flow Target	2.19
2.4.4 D&R Canal Diversion	2.19
2.4.5 Merrill Creek Reservoir and Electrical Generation Cooling Water Use Replacement	2.19
2.5 Assessing Flow Management Benefits and Costs	2.20
2.6 Improving Flow Management within Existing Limitations	2.21
 3.0 THE RECOMMENDED PROCESS FOR FLOW MANAGEMENT ISSUE RESOLUTION	 3.1
3.1 Recommended Process for Resolving Interstate Flow Management Issues	3.1
3.1.1 Review and Revise the Tools and Performance Measures on a Periodic Basis	3.2
3.1.2 Development of Monitoring and Forecasting Capabilities to Support Adaptive Management	3.2

3.1.3 The Concepts of Flow Relationships, Performance Criteria, and Index Displays 3.2

4.0	FLOW ISSUES AND TECHNICAL RECOMMENDATIONS	4.1
4.1	East Branch Delaware River from Pepacton Dam to Junction with West Branch	4.1
4.1.1	Setting	4.1
4.1.2	Issues and Analysis	4.2
4.1.3	Additional Information and Study Needs-East Branch Delaware River	4.4
4.2	West Branch Delaware River from Cannonsville Dam to Junction with East Branch	4.6
4.2.1	Settings	4.6
4.2.2	Issues and Analysis	4.7
4.2.3	Addition Information and Study Needs - West Branch Delaware River	4.9
4.3	Neversink River from Neversink Dam To Mouth	4.10
4.3.1	Setting	4.10
4.3.2	Issues and Analysis	4.11
4.3.3	Additional Information and Study Needs - Neversink River	4.11
4.4	Main Stem Delaware River from Hancock to Trenton	4.12
4.4.1	Setting	4.12
4.4.2	Issues and Analysis	4.16
4.4.3	Additional Information and Study Needs - Main Stem Delaware River from Hancock to Trenton	4.21
4.5	Lackawaxen River from Wallenpaupack Creek to Mouth	4.22
4.5.1	Setting	4.22
4.5.2	Issues and Analysis	4.23
4.5.3	Additional Information and Study Needs - Lackawaxen River from Wallenpaupack Creek to Mouth	4.24
4.6	Mongaup River from Swinging Bridge Reservoir to Mouth	4.25
4.6.1	Setting	4.25
4.6.2	Issues	4.26
4.6.3	Additional Information and Study Needs - Mongaup River from Swinging Bridge to Mouth	4.26
4.7	Lehigh River from F.E. Walter Dam to Mouth	4.27
4.7.1	Setting	4.27
4.7.2	Issues	4.28
4.7.3	Additional Information and Study Needs - Lehigh River	4.29
4.8	Pohopoco Creek from Beltzville Dam to Mouth	4.31
4.8.1	Setting	4.31
4.8.2	Issues	4.31
4.9	Tohickon Creek from Nockamixon Dam to Mouth	4.32
4.9.1	Setting	4.32
4.9.2	Issues and Analysis	4.32
4.9.3	Additional Information and Study Needs - Tohickon Creek	4.33
4.10	Delaware Estuary and Bay from Trenton to Mouth	4.34
4.10.1	Setting	4.34
4.10.2	Issues and Analysis	4.35
4.10.3	Additional Information and Study Needs - Deleware Estuary and Bay	4.38
4.11	Tulpehocken Creek from Blue Marsh Dam to Mouth	4.40
4.11.1	Setting	4.40
4.11.2	Issues and Analysis	4.41
4.11.3	Additional Information and Study Needs - Tulpehocken Creek	4.41
4.12	Schuylkill River from Confluence with Tulpehocken Creek to Mouth	4.42
4.12.1	Setting	4.42
4.12.2	Issues and Analysis	4.42
4.12.3	Additional Information and Study Needs - Schuylkill River	4.43
4.13	General Recommendations To Improve Analysis Capabilities and Promote Management Flexibility	4.44
4.13.1	High Priority Recommendations	4.44
4.13.2	Medium Priority Recommendations	4.47

5.0	CASE STUDIES	5.1
5.1	Upper Basin Case Studies	5.1
5.1.1	Case Study 1 - Trout Unlimited Proposal	5.1
5.1.2	Case Study 2 - NYC Reservoirs Operated to meet Trenton Target	5.6
5.1.3	Case Study 3 - NYC Reservoir Balancing	5.8
5.2	Lower Basin Case Studies	5.10
5.2.1	Case Study 4 - Rafting Releases at Beltzville	5.10
5.2.2	Case Study 5 - Temperature Control Below Blue Marsh Reservoir	5.12
6.0	REFERENCES	6.1
